

THE MORE THINGS CHANGE

heselvorberg.de

the more they stay the same.

The industrial production of steel tubes dates back to the groundbreaking invention of the Mannesmann Brothers in the late 19th century. Just a short while later Mannesmann became known and respected for its quality throughout the world.

Today, in the 21st century, the future is about to be changed once more – by the **ITER nuclear fusion reactor**. We equipped this pioneering project with stainless steel and nickel alloy tubes, which remain the industry benchmark.

Mannesmann Stainless Tubes. Quality to make history.
